Young people

The challenge of Africa's young faced the digital divide remind the high cost of Internet access, by our actions, the costs are being reduced step by step. The lack of resource cannot afraid African Young in the development way. We purposed in the NEPAD Youth program to insert young as the major actor in the schoolnet project. Besides, we shared many experiences with the young during the conferences and youth meeting we participated through the world.

Young people can help their communities voluntarily. Volunteers can change the life of many people.

Additional information

Only the actions and commitment of young people can develop the Africa's communities durably. The Africa's development must be a common challenge!
